

WORKSHOPS FOR DIDACTICS IN HIGHER EDUCATION

Module 2

TEACHING IN ENGLISH

8 AE (SQ)

The main idea of this workshop is to give the participants the language that they need to be able to teach in English. You will get to know language that will help to give structure to what is said and language that will help to better interact with students. Analysis of texts and clips will be part of the workshop. The idea is to focus on the vocabulary used in lectures, not the actual content as such. In the afternoon the participants will give a previously prepared 10 min presentation. The idea of these presentations is to give the participants the opportunity to make use of what they have learnt. If wished, the participants can be videotaped.

TEACHING IN ENGLISH

16 AE (12 SQ | 4 PBA)

Whilst sound teaching skills are a basic requirement in all contexts, the use of English as a lingua franca in teaching – given the growing number of students with different linguistic and cultural backgrounds – has increased the complexity of the teaching task. Therefore, this workshop will offer both practical support and the opportunity to refine English language skills in order to teach academic disciplines in English. Each participant is invited to present a 10-minute excerpt from a lecture or short presentation.

USING LEARNING STYLES IN A MULTI-NATIONAL EMI SETTING

8 AE (4 MMD | 4 LLC)

This workshop is for teachers in higher education who will or have begun to teach their subjects through the medium of English in an international environment. We will take a look at how Kolb's Experiential Learning Cycle can be used as a basis for designing lectures that address different learning styles in a multi-national EMI setting. By attending this seminar, you will be able to design materials with the different learning styles in mind, understand how culture can influence learning, create lectures that are more varied and engaging and reactivate your English skills for lecturing.
